Mooner · launch

The app stays dark. The only illustrated part is **three scene pictures** (lobby, loading, liftoff), made once and shared by every launch. Wallets show up as **their PFPs**. Numbers are the real pool: **10 SOL, seats 0.1–1 SOL, one hour**, so 10 to 100 wallets. Here 38 wallets are in; a 0.5 SOL seat gets ≈13.2M tokens (from the curve in web/src/lib/curve.ts).

UI: Poster UI | Terminal UI | **Cozy UI**

Poster: flat ink, square, halftone. Terminal: what you saw before. Cozy: warm dusk colours, soft round shapes, a Mooner who talks to you.

SCENE ART: Poster | Cartoon | **Cozy**

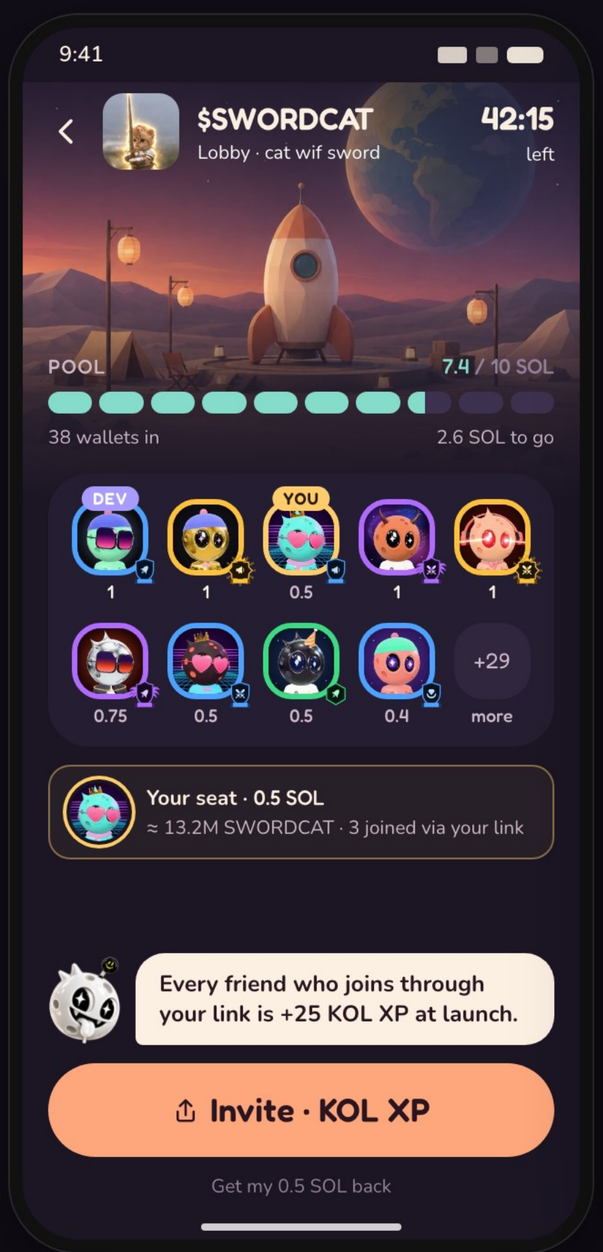

Each UI picks its own art; mix them here.

Phone

Lobby → Pool full → Loading → Live.

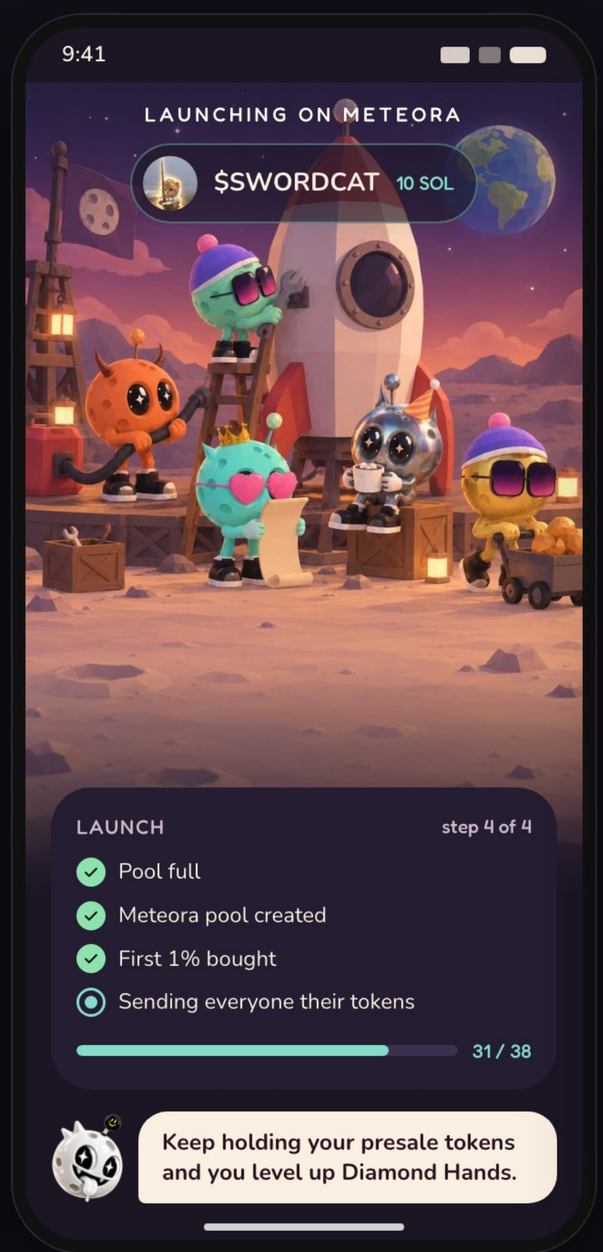

Lobby

A 10 SOL pool fills with 10 to 100 wallets, so the lobby is a crowd of PFPs: frame = best title's rarity, corner = that badge, number = SOL in (1 SOL is the most a seat takes). Your seat and the invite underneath.

Pool full

It hits 10 SOL: everyone gets a tick, a 3-2-1, then the launch runs by itself.

Loading

One shared scene for every launch, with the four real launch steps and tokens going out.

Live

Your tokens, your XP per title, and the crowd that launched it.
